

# BREC Burbank Park Soccer Complex Upgrade and Field Expansion

## PROJECT STATS

**Location:** Baton Rouge, Louisiana

**Total Size:** 83 Acres

**Type of Work:** Expansion

**Project Cost:** \$ 4,000,000

**Completion Date:** October 2008

## PROJECT NOTES

In response to recommendations within the BREC Strategic Plan & Sports Tourism Study to upgrade existing sports facilities and provide additional high quality sports facilities, BREC Planning and Engineering Staff prepared a master plan to renovate and upgrade the Burbank Soccer Complex with addition of baseball fields. Building on a successful, ongoing relationship, BREC turned to D. Honoré Construction.

Starting with semi-rough land that needed to be cleared, brought to grade and converted to soccer fields, the 83 acre expansion includes a dog park, four baseball fields, parking lot and a pump irrigation system for over 40 zones. Today, it is one of BREC's most popular sports facilities.

*"Working with D. Honoré Construction was one of the more fluid, effortless processes I have encountered in my business. Dwayne and his staff are extremely accessible and accommodating, and they maintain great communication lines throughout the project. They work diligently and are determined to perform to the owner's expectations."*
