

# Hancock Bank

## PROJECT STATS

**Location:** Zachary, Louisiana

**Total Size:** 6,500 SF

**Type of Work:** New Construction

**Project Cost:** \$728,916

**Completion Date:** December 2004

## PROJECT NOTES

Built as a prototype in the market, this structure represented Hancock Bank's architectural standard for all branches going forward and D. Honoré Construction was trusted with building the landmark from the ground up. The branch houses traditional lobby banking services, three drive-through teller lanes, a drive-up ATM and safe deposit boxes. Though it was the first of its kind for Hancock Bank, DHC again demonstrated remarkable agility and completed the job in just six months—three months ahead of industry standard.

*"We excel at corporate projects. Building from the inside out, we ensure every detail, from start to finish, is thoughtfully constructed. If the situation calls for solutions that challenge conventional thinking, we will find a way. Period."*
