## PROJECT STATS

**Location:** Prairieville, Louisiana

**Total Size:** 8,000 SF

**Type of Work:** New Construction

**Project Cost:** \$1,660,000

**Completion Date:** May 2009

## PROJECT NOTES

Franciscan Missionaries of Our Lady Health System boasts another exceptional facility in its system. A standard wood frame structure with brick veneer and stucco, the new St. Elizabeth Dutchtown medical plaza includes twelve exam rooms and state of the art equipment. Even with delays regarding a sewer wastewater treatment plant, DHC was able to finish the project three months ahead of schedule. Working in close alliance, the superintendent and design team ensured the owner's needs were met at every stage of the project. We like to call that "healthy project management."

*"It was with great pleasure to finally work with such a wonderful and professional company as D. Honoré Construction. They really know how to keep a project moving and are a class 'A' act."*
