

St. David Catholic School Gym and Classroom Replacement

PROJECT STATS

Location: New Orleans, Louisiana

Total Size: 15,531 SF

Type of Work: New Construction

Project Cost: \$4.3M

Completion Date: December 2013

PROJECT NOTES

This project consisted of replacing the existing school building for the St. David Catholic Church that was badly damaged by Hurricane Katrina. While trying to maintain the same appearance for this historic neighborhood building and upgrading per FEMA requirements; the major changes occur in the use of the building which will now house a Head Start Program for age 3 to 5.

We are honored to be part of helping to bring back and rebuild parts of the City of New Orleans which will flourish the younger

generation in a new great learning environment with new classrooms and gymnasium.

CONTINUING A TRADITION
